## Adding Supernumerary Teeth to the Chart in axiUm

- If a supernumerary tooth has been treated, indicate the tooth site as follows:

Primary: add 'S' character behind the letter of the nearest adjacent tooth designation (e.g., an extra tooth next to C would be CS).

Permanent: add 50+ the nearest adjacent tooth number (e.g., an extra tooth next to 28 would become 78).

- To **Chart Add** a supernumerary tooth as a **Finding** during an initial exam

- on side toolbar in the **EHR**

- -opens **Chart Add** tab-

- select **Findings** radio button

Procedure subtab- Existing Conditions Category-

Select **Supernumerary tooth** as a Condition

Indicate the tooth site by adding 50 + nearest tooth #

Select **Add Finding** button to **Save**
